

Full-time position

Plant breeder

JatroSolutions GmbH is an internationally operating company focused on the development and worldwide commercialization of *Jatropha curcas* products and cultivars.

For our office in Stuttgart, we are looking for a **plant breeder in full-time** at the earliest opportunity with the following responsibilities:

- Management of the jatropha breeding program and development of the further breeding strategy
- Support and supervision of the activities at our testing stations in India, Cameroon and Paraguay including regular travels to the sites
- Definition and implementation of the necessary selection tools such as field and lab trials, molecular markers technology and similar
- Management and statistical analyses of phenotypic and genomic data
- Reporting to the managing director

You hold a PhD or MSc in agriculture or a related discipline. You have proven experience of working as a plant breeder or plant researcher. Experience and knowledge of bioeconomy disciplines are an advantage. High level of German and English are mandatory for this position, additional skills in Spanish are an asset. You dispose of good organization and coordination skills and pay attention to details. You are self-motivated, pro-active and have a high level of responsibility.

We offer a fair salary depending on your skills and job experience, long-term perspective in a leading position, and a pleasant working environment in a young and dynamic team.

If you feel addressed, please send your curriculum vitae, certificates and references in one pdf file to office@jatrosolutions.com.
